

## **Daniel Moyer, Creation Care Leader, St. Albans-Arcata**

Daniel is a leader in the Creation Care effort at St. Albans. His knowledge of solar technology and his understanding of the impact of climate change on all peoples informs his work at St. Albans and on the diocesan Commission on the Environment. Here is his story.

*Embracing the Creation Care movement at my parish (Saint Albans, Arcata, CA) has required courage, as it entails confronting established norms and advocating for a sustainable future. Not to mention getting up in front of people to talk! I've found that talking about being environmentally friendly often means challenging ingrained habits and promoting alternative, eco-conscious choices. By openly discussing environmentally friendly practices, our group has been able to inspire collective action and foster a sense of responsibility towards God's creation at Saint Albans. I find courage in my fellow Creation Care Ministry team members and by knowing that our church community is adopting a greener lifestyle. Being a leader in the Creation Care Ministry took me out of my comfort zone and helped me to realize my determination to help the environment.*
